This presentation contains certain non-IFRS (“International Financial Reporting Standards”) financial measures, being Adjusted EBITDA and Adjusted EBITDA margin. Our management believes that disclosure of Adjusted EBITDA can provide useful supplemental information to investors and financial analysts in their review of our ability to service our debt requirements. These non-IFRS measures are provided to enhance investors’ overall understanding of our current financial performance and its prospects for the future. Specifically, we believe the non-IFRS measures provide useful information to both management and investors by excluding certain expenses, gains and losses that may not be indicative of our core operating results and business outlook. Adjusted EBITDA and Adjusted EBITDA margin may not be comparable to other similarly titled measures of other companies and have limitations as an analytical tool and should not be considered in isolation or as a substitute for analysis of our operating results as reported under IFRS. Non-IFRS measures including Adjusted EBITDA and Adjusted EBITDA margin are not measurements of our performance or liquidity under IFRS and should not be considered as alternatives to operating profit or net profit, or as alternatives to cash flow from operating activities, or other metrics derived in accordance with IFRS.
